Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18-24 and 47-49 are still rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al (US 6142641).

Re clm 18: Cohen et al discloses an exposure apparatus (Fig 5A) comprising: a light source (31) emitting non-exposure visible light used to align the components of the exposure apparatus, a second light source (8) emitting EUV exposure light to expose a wafer (7) after the alignment, an optical system (Fig 1), and a photo-sensor (46) which is used in adjustment of an optical property of the optical system. However, Cohen et al does not disclose that a single light source is used to generate the exposure and non-exposure light. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine the two light sources (8 and 31) of Cohen et al into a single light source because it would improve efficiency and an x-ray source (8) and observation system (Col 14 line 22)

Re clm 19: Plasma (Col 4 line 6)

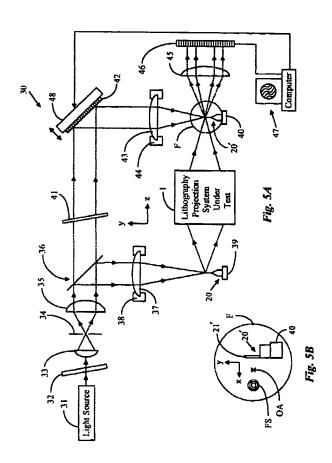

Re clm 20: first (37) and second (45) optical systems

Re clm 21: Intersection (F)

Re clm 22: vacuum chamber (31) and outside the chamber (Fig 5A)

Art Unit: 2877

Re clms 23-26, 47-49: In regards to claims 23-26, and 47-49 the above disclosed apparatus is capable of performing the claimed method steps.

Allowable Subject Matter

Claims 1,12,17,25,26, 28-46 and 50 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or suggest a second sensor in conjunction with the rest of the claimed subject matter.

Art Unit: 2877

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sandstrom 6399261 and Failes 4165180.

Response to Arguments

The applicants arguments filed 12-17-02 and 1-17-03 have been considered but are not persuasive. The applicant argues claims 18, 23 and 24 that the Cohen et al reference dose not disclose obtaining positional information relating to the x-ray source. However, the Cohen et al reference dose disclose obtaining positional information relating to the x-ray source because the positional information of the mirrors are obtained in relation to the x-ray light source and therefore relative positional information is being obtained between the mirrors and the x-ray light source and relative movement is being performed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2877

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Khaled Brown whose telephone number is 703-306-

5738. The examiner can normally be reached on M-F 8:30am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Frank G. Font can be reached on 703-308-4881. The fax phone numbers

for the organization where this application or proceeding is assigned are 703-308-7722

for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-308-

1782.
